

IT'S COMING

Give me time to heal my sight

We're the seeds that works this land

You should realize, you must realize

We are...

We're not shy, we voice the rights

There are reasons to be alive

You should realize, you must realize

We are...

Give me time to heal my sight

We're the seeds that works this land

You should realize, you must realize

We are people, we are people

We are people, we are people.

You are surprised, we can survive

And my people rise their hands

You should realize, you must realize

We are people...

People don't reflect on it

We know how to get away

Pain around the way

It's coming, it's coming for us...

It's coming for us, it's coming for us.

You are surprised, we can survive

You should realize, you must realize

We are people, we are people...
